🧩 PROFILE

Motivated Computer Science student with practical experience in software development and modern web technologies. Strong foundation in programming, databases, and API development, with a passion for building scalable applications and continuously learning new technologies.

🧠 SKILLS

Frontend development

HTML 5 , CSS3 , JavaScript(ES6+) , React.js , Responsive Web Design , Bootstrap , Tailwind CSS , Vite .

Backend & Databases

Firebase , MongoDB , Node.js , Express.js , REST APIs.

AI Website Development

ChatGPT , Lovable AI , Bolt AI , Cursor AI , Github Copilot , Gemini Ai , Google stitch .

Tools & Platforms

Git , Github , VS Code .

📁 PROJECTS

PulseOS | React.js, Node.js, Express.js, Socket.io, Tailwind CSS [🔗](#)

- Designed the UI/UX prototype using **Stitch AI** to rapidly explore modern dashboard layouts and user flows, then refined the design in the development phase.
- Developed a responsive system monitoring dashboard using **React.js, Node.js, Express.js**, and **Socket.io** [🔗](#) , leveraging **Cursor AI** to accelerate component development, code generation, debugging, and refactoring.
- Integrated REST APIs to fetch real-time system health metrics and implemented efficient state management for seamless data updates.
- Built real-time communication using **Socket.io** [🔗](#) to stream live system information without requiring page refreshes.
- Created reusable and modular components such as **SystemPanel** and **TerminalPanel** using **Tailwind CSS**, improving scalability, maintainability, and code reusability.
- Developed backend API endpoints to expose system-level data and ensured smooth frontend-backend integration for real-time monitoring.

Stock Trading Platform | MERN Stack (MongoDB, Express.js, React.js, Node.js) [🔗](#)

- Designed the UI/UX prototype and application workflow using **Cursor AI** to rapidly iterate on layouts, dashboard structure, and user experience before development.
- Accelerated frontend development using **Antigravity AI** for AI-assisted code generation and rapid production while customizing and optimizing the generated components to meet project requirements.
- Developed a full-stack stock trading platform using the **MERN Stack**, implementing secure user authentication, portfolio management, and session handling.
- Integrated REST APIs to fetch and display real-time stock market data with efficient state management for a smooth user experience.
- Built a responsive and performance-optimized React interface with reusable components for scalability and maintainability.
- Used **Git** and **GitHub** for version control, debugging, and collaborative development throughout the project lifecycle.

🎓 EDUCATION

Bachelor of Technology (B.Tech [🔗](#)) – Computer Science & Information Technology
Dronacharya College of Engineering, Gurugram

(2022-2026)
